

OPTIONS TO SET YOUR OWN STANDARD

Stainless Steel Wingplates

Stainless steel wingplates with collared holes and embossed ribs minimize maintenance expenses from road de-icing chemicals and improve overall image.

Rail Lift Pads

Front and rear rail lift pads protect the bottom rail and add versatility in intermodal transportation for railway applications. Available in steel or aluminum.

Stainless Steel Vertical & Horizontal Dock Bumper

Easy-to-clean, corrosion resistant stainless steel dock bumpers create a clean look that increases resale value and trailer life.

Pintle Hook/Doubles

For greater operating efficiency, pintle hooks are available for single axle, turn pike double and Canadian C-Train style dual pintle hook trailer operations.

Wide Track Suspension for Wide Base Tires

The wide-track system is available for use with single-wide base tires. It features 6" wider spring centers for greater stability and improved tracking.

Tire Inflation Systems

Most manufacturer's systems are available to maintain optimum tire pressure for improved fuel economy, maximized tire life and lower overall fuel costs.

Anti-Dock Walk Devices & Dump Valves

A variety of anti-dock walk devices and dump valves may be employed to stabilize the trailer during loading and unloading, creating a safer work environment.

Factory-Installed Refrigeration Units & Accessories

Utility offers installation of all models of refrigeration units, both standard single temperature units and all versions of multi-temp refrigeration units.

Electric Stand-by Refrigeration Units

Operating an electric stand-by during pre-cooling or when stationary yields significant fuel savings that adds to your bottom line.

Air Return Bulkheads

A wide variety of air return bulkheads are available to fit all types of refrigeration units. Several different styles of pallet stops are also available.

Stainless Steel Side Skin

Stainless steel side skins combine corrosion resistance and enhanced appearance in one package for greater resale value and image.

Grab Handles

Stainless steel, aluminum and chrome grab handles are available in a variety of styles for improved driver safety.

Diamond Pattern Stainless Steel Door Skin

Our stainless steel door skin is easy to clean and resists corrosion, while the high gloss quilted design presents a unique appearance and reduces glare to following vehicles.

Rear Steps

Available from several manufacturers for ease of entrance and exit for improved driver safety.

Stainless Steel Electropolished Lock Rods

Electropolished stainless steel produces a corrosion resistant, easy-to-clean polished finish for improved appearance and increased resale value.

Customized Floor Systems

Multiple floor systems are available including dairy and knurled styles, and extended service floors with extra-thick upper wear surfaces in both duct and flat top dry freight styles.

Custom Wearbands

Multiple heavy duty aluminum, fiberglass reinforced plastic and HDPE plastic wearband options are available to fit your operation's needs for durability.

Severe Service High Impact Linings

Additional thicknesses of high impact linings from multiple suppliers are available for severe service operations.

Recessed Logistic Track

Our recessed logistics track allows customers to use a variety of load restraining devices (straps, load bars, etc.) without sacrificing inside width.

Electrical System Options

Multiple clearance light packages, tracking systems, remote thermostats, tire pressure monitoring systems and other state-of-the-art technologies keep product safe during transit.

Clearance Light Packages

An array of LED clearance light models and configurations are available to meet the needs of your operation.

Shore Power Plug at Rear

The highest quality plug and wiring system in the industry. In addition to greater fuel savings during operation, multiple grounding features improve safety.

Factory-Installed Decals

The highest quality decal installation available is completed at our factories so your trailer is ready to operate as soon as you pick it up.

Aerodynamic Side Skirts

The USS-120A-4 advanced side skirt is SAE tested and SmartWay® verified to achieve greater than 5% fuel savings and is CARB-compliant when used with low rolling resistance tires.
